

Proxy: Forward proxy: server acts on behalf of clients. Client needs to talk to forward proxy to talk to the server. Proxy can hide client's identity. The IP address might just be override/hiden by the proxy.

Use a proxy 可用于翻墙。

Reverse proxy is useful. We can filter out unneeded results. for system request (e.g. cache, login, as a load balancer)

(Nginx can be used as a proxy)
