

- 16,000 ports that a machine can listen.
- we need to specify which port to communicate on
- HTTP protocol uses port 80
- HTTPS protocol uses port 443

example: `nc -l 8081`

listen on this port

`nc 127.0.0.1 8081`

communicate 127.0.0.1 at 8081

You can talk to yourself now!
